

How to prepare a presentation for journal club

Length

10-15 minutes MAX

→ translates to ~10-12 slides

Slide setup

→ Minimum text other than direct quotes

→ Figures from the paper

Ideas

→ Check out the journal

→ Supplementary materials

Structure of the talk

1. Some broader context
 2. Specific context (e.g. study species)
 3. Aims of the study
 4. 1-2 slides of methods (don't overdo this!)
 5. Results: focus on figures
- Points for discussion:
6. Something expected / something unexpected
 7. Strengths and weaknesses
 8. Conservation implications

Conservation implications: how useful is this paper **in practice**?

Does it address a real problem? A local or broader one?

Is it directly or indirectly relevant for policy/management?

How can we translate its results into outcomes?
